

Please do not implement any proposal that would lessen Indiana's Telephone Privacy law. Since implemented, I do not receive any type of telemarketing phone calls. My dinner is not interrupted by unwanted phone calls. If I want some service or product, I will initiate the phone call. Not some stanger into my house via a phone line. I cannot tell you how many unwanted phone calls I received before I placed myself on the "No Call List". I now maintain control of my telephone. The law that Indiana implemented is working very well. I know that lots of my friends would agree with me. If you take away the effectiveness of the Indiana law allowing telemarketing firms to invade my home again, I will not be pleased.  
Thank you for your time.
